Issue 1: Sequencer not showing up
- Possible solution: try recoding the sequencer so that there are less buttons in each row
    - Resolved (was looking at the wrong live webpage)

Issue 2: Sequencer row labels and gain sliders styled inside of the sequencer, messing up the entire grid.
- Possible solution: styling problem, so translate labels to the left more
- Possible solution: move the sliders near the buttons
    - Resolved

Issue 3: Gain sliders are not moving after being styled
- Possible solution: restyle and recode gain sliders
- Possible solution: make sure audio is connected to the javascript
- Removed completely, to be added if possible

Issue 4: export button not working or showing file saving
- Possible solution: recode
    - Multiple mistakes and missing "fetch(soundFile) in top of "if(soundFile)"
